Nu Html Checker

This tool is an ongoing experiment in better HTML checking, and its behavior remains subject to change

Showing results for contents of text-input area

Checker Input

Show ☑ source   ☐ outline   ☐ image report

Options…

Check by text input ▾   ☐ css

```
            <p id="showanswer">
                    <span id="prime"></span>
                    <br>
                    <br>
                    <span id="composite"></span>
                    <br>
                    <br>
                    <span id="neither"></span>
                    <br>
                    <br>
            </p>

            <script src="js/script.js"></script>
    </body>
    </html>
```

Check

Use the Message Filtering button below to hide/show particular messages, and to see total counts of errors and warnings.

Message Filtering
